			DATE MAILED: 06/23/2005		

Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)			
	09/977,746	MALLIS ET AL.			
Office Action Summary	Examiner	Art Unit			
	David E. Bochna	3679			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on 22 March 2005.					
• • • • • • • • • • • • • • • • • • • •	action is non-final.				
•	Since this application is in condition for allowance except for formal matters, prosecution as to the ments is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.				
Disposition of Claims					
4) Claim(s) 10-19 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 10-19 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9) The specification is objected to by the Examiner.					
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 					
Attachment(s) 1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date	4) Interview Summary Paper No(s)/Mail Da 5) Notice of Informal P 6) Other:	(PTO-413) ate atent Application (PTO-152)

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 10-19 are rejected under 35 U.S.C. 1 12, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. In claim 10, lines 9-10 state that "irreversible plastic deformation of the positive stop torque shoulder does not occur upon final makeup".

This appears to be inconsistent the specification as originally filed which on page 6, lines 1-2 states that torque "may be applied to the positive stop torque shoulder prior to final make up, without causing irreversible plastic deformation". Thus the claims purport that no irreversible plastic deformation occurs at final makeup yet the specification only supports no irreversible plastic deformation prior to final make up. See also page 7, paragraph (0031).

- The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is meant by the phrase "irreversible plastic deformation". Is there a a type of plastic deformation that is reversible?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 10-11, 15-18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Klementich '315. The Klementich '315 rejection which was made in the final office dated 12/22/04 is being maintained and incorporated here by reference to that final office.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klementich in view of Blose '081. The Klementich '315 in view of Blose '081 rejection which was made in the final office dated 12/22/04 is being maintained and incorporated here by reference to that final office.

Response to Arguments

9. Applicant's arguments filed 3/22/05 have been fully considered but they are not persuasive.

Applicant argues that the 112, 1st paragraph rejection should be removed because the specification as originally filed recited that torque "may be applied to the positive stop torque

Art Unit: 3679

shoulder prior to final make up, without causing irreversible plastic deformation". Applicant argues that if no irreversible plastic deformation occurs prior to final makeup, one of ordinary skill in the art would conclude that no plastic deformation would occur upon final makeup.

The Examiner disagrees with this assertion. There is no reason for one of ordinary skill in the art to assume that when torque may be applied to the positive stop torque shoulder prior to final make up, without causing irreversible plastic deformation, that no plastic deformation would not occur upon final makeup.

Applicant also argues that Klementich does not disclose the limitation that "a torque is applied such that irreversible plastic deformation of a torque shoulder does not occur upon final makeup", and cites various lines from Klementich to support this argument. However, none of the references to Klementich disclose that the shoulders of Klementich are plastically deformed. The references cited by the Applicant only state that the shoulders of Klementich touch to form a seal. The shoulders 520, could only be elastically deformed, or not deformed at all, and still create the desired seal.

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David E. Bochna whose telephone number is (571) 272-7078. The examiner can normally be reached on 8-5:30 Monday-Thursday and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571) 272-7087. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
